

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings of claims in the application:

LISTING OF CLAIMS:

1. (original): Safety device for a fall restraint, comprising anchoring means to which the fall restraint can be coupled directly or indirectly, and comprising fastening means for a firm and durable connection to an object, characterized in that the fastening means comprise a flexible fastening flap from which a fastening net extends, and that the anchoring means are connected via the fastening net to the flexible fastening flap.
2. (original): Safety device as claimed in claim 1, characterized in that the fastening net is attached to the fastening flap.
3. (original): Safety device as claimed in claim 1, characterized in that the fastening net is integrated in the fastening flap.
4. (currently amended): Safety device as claimed in ~~one or more of the foregoing claims~~ claim 1, characterized in that the fastening net is strengthened with longitudinal threads and transverse threads.
5. (currently amended): Safety device as claimed in ~~one or more of the foregoing claims~~ claim 1, characterized in that the fastening net is manufactured at least partially from plastic or metal.

6. (currently amended): Safety device as claimed in ~~one or more of the foregoing claims~~ claim 1, characterized in that the fastening flap forms part of an optionally unrolled roll of roof-covering material.

7. (original): Safety device as claimed in claim 6, characterized in that the roof-covering material comprises a material from a group of plastic and bitumen.

8. (currently amended): Safety device as claimed in claim 6 ~~or 7~~, characterized in that the fastening net is fixed to an inlay in the roof-covering material and is incorporated simultaneously therewith in the roof-covering material.

9. (currently amended): Safety device as claimed in ~~one or more of the foregoing claims~~ claim 1, characterized in that the anchoring means comprise a resilient construction.

10. (currently amended): Safety device as claimed in ~~one or more of the foregoing claims~~ claim 1, characterized in that the anchoring means comprise a fixing eyelet, ring or loop.

11. (new): Safety device as claimed in claim 2, characterized in that the fastening net is strengthened with longitudinal threads and transverse threads.

12. (new): Safety device as claimed in claim 3, characterized in that the fastening net is strengthened with longitudinal threads and transverse threads.

13. (new): Safety device as claimed in claim 2, characterized in that the fastening net is manufactured at least partially from plastic or metal.

14. (new): Safety device as claimed in claim 3, characterized in that the fastening net is manufactured at least partially from plastic or metal.
15. (new): Safety device as claimed in claim 4, characterized in that the fastening net is manufactured at least partially from plastic or metal.
16. (new): Safety device as claimed in claim 2, characterized in that the fastening flap forms part of an optionally unrolled roll of roof-covering material.
17. (new): Safety device as claimed in claim 3, characterized in that the fastening flap forms part of an optionally unrolled roll of roof-covering material.
18. (new): Safety device as claimed in claim 4, characterized in that the fastening flap forms part of an optionally unrolled roll of roof-covering material.
19. (new): Safety device as claimed in claim 5, characterized in that the fastening flap forms part of an optionally unrolled roll of roof-covering material.
20. (new): Safety device as claimed in claim 21, characterized in that the anchoring means comprise a resilient construction.
